SUMMARY

Summary (based on whitepaper)

What is Polkadot? Polkadot development is on track to deliver the most robust platform for security, scalability, and innovation. Currently, Polkadot is in the Governance and Removing Sudo phase of launch. Polkadot Features: True interoperability – Polkadot enables cross-blockchain transfers of any type of data or asset, not just tokens. Connecting to Polkadot gives you the ability to interoperate with a wide variety of blockchains in the Polkadot network. Economic & transactional scalability – Polkadot provides unprecedented economic scalability by enabling a common set of validators to secure multiple blockchains. Polkadot provides transactional scalability by spreading transactions across multiple parallel blockchains. Easy blockchain innovation – Create a custom blockchain in minutes using the Substrate framework. Connect your chain to Polkadot and get interoperability and security from day one. This ease of development helps Polkadot's network grow. Forkless and future-proof – Polkadot can upgrade without hard forks to integrate new features or fix bugs. This capability enables Polkadot to easily adapt to changes and upgrade itself as better technologies become available. Security for everyone – Polkadot's novel data availabi ... read more
