

CIS API

CIS API

CIS API provides access to our Unified Web API and websocket services:

CIS RealTime

Access normalized exchange, aggregated and index data over our real time websocket service.

CIS Data API

Access news, reference data, timeseries data & searchable content.

CIS Trading API

Control access / connectivity to your exchange accounts.
Submit & manage orders across multiple exchanges through a single, unified API.

CIS Portfolios API

Create, Manage & Monitor portfolio's using your offline & connected exchange accounts.

CryptoIndexSeries

CIS API

CIS RealTime

- Low-latency, full tick, normalized data for major crypto exchanges
- Live aggregated data (CISAGG universe)
- Live Cross Calculated Universe (CISCALC universe)
- Live Index Data (CISIDX Universe)

Access live crypto market data through a single real time feed with ease.

Our multi-location cloud architecture allows us to deliver low-latency exchange data through a single consolidated feed.

No need to manage codebases or servers for multiple exchanges - CIS RealTime will satisfy your live market data needs through a single consolidated feed.

CIS API

CIS Data API

Harness the power of our data API to power your systems & applications.

Timeseries - Extensive Timeseries data (tick, intraday & interday) across multiple exchanges & aggregated / calculated datasets. Includes customisable Technical Indicator calcs.

News - Access our extensive News archive including our AI-driven sentiment via search and aggregation calls.

Digital Assets - Aggregated & Calculated digital asset pricing data, our proprietary taxonomy all bundled into a set of endpoints to make it simple to search for and access digital asset information, pricing & performance data.

Indices - Access index information, constituents & constituent history.

Exchange Data - Access reference data for exchange traded pairs & instruments. Powerful search tools allow you to find and compare data across multiple exchanges instantly.

These are just examples of the data & features. Get a free trial to test out the full offering

 CryptoIndexSeries

CIS API

CIS Trading API

Don't waste time dealing with the different exchange's API's and connections. Our Unified Trading API gives you a single API to work with but let's you access multiple exchanges

Manage Exchange Connections

Securely store your exchange accounts API keys with us to get started using our trading API

Submit & Manage Orders

A single endpoint allows you to Create an order across any of your connected exchange accounts. Additional endpoints are available that allow you to view open orders and cancel an order.

Balance Info

Access your current balances for connected exchange accounts.

CryptoIndexSeries

CIS API

CIS Portfolio API

Utilise our powerful portfolio data and features to track both offline and exchange accounts holdings. Combined accounts to a single portfolio to generate performance analytics across holdings of multiple accounts.

Holdings & Performance

We pull your exchange accounts historical trades & transfers and keep the data synched so we can calculate daily holdings and value history as well as performance analytics

Trade & Transfer History

Search & view trade and transfer activity for each of your connected exchange accounts.

File upload / Download

Easily upload or extract data for your manual accounts. For example, if you have several csv files downloaded from Binance you can upload them via the portfolio system and we'll update them to the portfolios system.
